

Message from the MET 2018 Co-Chairs

Welcome to the 3rd International Workshop on Metamorphic Testing (MET 2018), held in conjunction with the 40th International Conference on Software Engineering (ICSE 2018) in Gothenburg, Sweden, on May 27, 2018.

This workshop aims to bring together researchers and practitioners in academia and industry to discuss research results, experiences and insights into metamorphic testing. MET 2018 provides a platform for the discussion of novel ideas, new perspectives, new applications, and the state of research, related to or inspired by metamorphic testing.

MET 2018 received a total of nine submissions from five countries, including 24 authors from both academia and industry. Each paper received at least three reviews. They were evaluated based on their rigor, significance, originality, technical quality and presentation.

Overall, eight papers out of the nine submissions were accepted for presentation on the workshop, where five are regular papers and three are short papers. The acceptance rate of regular papers is 55.6%.

These papers will be presented in three sessions: (1) Metamorphic Relations and Test Cases; (2) Metamorphic Testing Applications; and (3) Beyond Metamorphic Testing. In addition, a keynote speech will be given by Dr. Sergio Segura from University of Seville, Spain.

We would like to thank the authors, Program Committee members and the ICSE 2018 Workshop Chairs for making MET 2018 possible. We thank you for participating and hope that you enjoy the program.

Xiaoyuan Xie, Laura L. Pullum, and Pak Lok Poon
