Message from Demonstrations Chairs of ICSE 2018

The objective of the ICSE 2018 Demonstrations Track is to excite the software engineering community about new advances in our field through compelling demonstrations that help advance research and practice. The track is a highly interactive venue where researchers and practitioners can demonstrate their tools and discuss them with attendees.

We received 72 submissions from 283 authors from 20 countries. Each submission was reviewed by three members of our program committee and further assessed in the online discussion phase. The program committee accepted 30 submissions to be presented in the demonstrations sessions at the conference.

Figure 1: Word cloud from keywords and abstracts of all submissions (made with wordclouds.com).

As the chairs of the demonstration track, we thank all authors for their submissions and the program committee members for their detailed reviews and lively discussion. We also thank the ICSE general chair Ivica Crnkovic as well as the proceedings chairs Barbora Buhnova and Patrizio Pelliccione for the perfect organization and great support.

We hope you will enjoy the demonstrations at the conference!
